Early Identification of Individuals with HIV/AIDS

Prepared for Data Presentation: September 20, 2024

Objectives

- **Become familiar with EIHA data and know its purpose**
- **Understand the impact on collaboration with other Ryan White parts and prevention**
- **Recognize your role in EIHA and its impact on future funding**

What is EIIHA?

- **Early Identification of Individuals living with HIV/AIDS**
- **A strategy introduced by HRSA in September 2009**
- **Its purpose is to ensure all people know their status, whether it's positive or negative**
- **It also outlines the need to develop a strategy to bring people with HIV into care**

EIHA Strategy

The four components:

1. Testing:

- Traditional and rapid testing

2. Counseling:

- Pre and post counseling, regardless of test result

3. Referrals:

- Referring individuals to appropriate services and verifying that services were accessed

4. Linkage:

- Linking individuals to medical care

EIHA vs Unmet Need

- **EIHA:** A person with HIV who is UNAWARE of their status and not in primary medical care.
- **Unaware of HIV Status:** Any person who has NOT been tested for HIV in the past 12-months.
- **Unmet Need:** A person with HIV who is AWARE of their status but not in primary medical care.

Knowing your HIV Status

- **The most important piece to the EIIHA puzzle is increasing the number of people being tested at least once every 12 months**
- **Two-fold outcome from this component:**
 1. **Increase the number of people who know their status**
 2. **Increase the number of people with HIV in care**

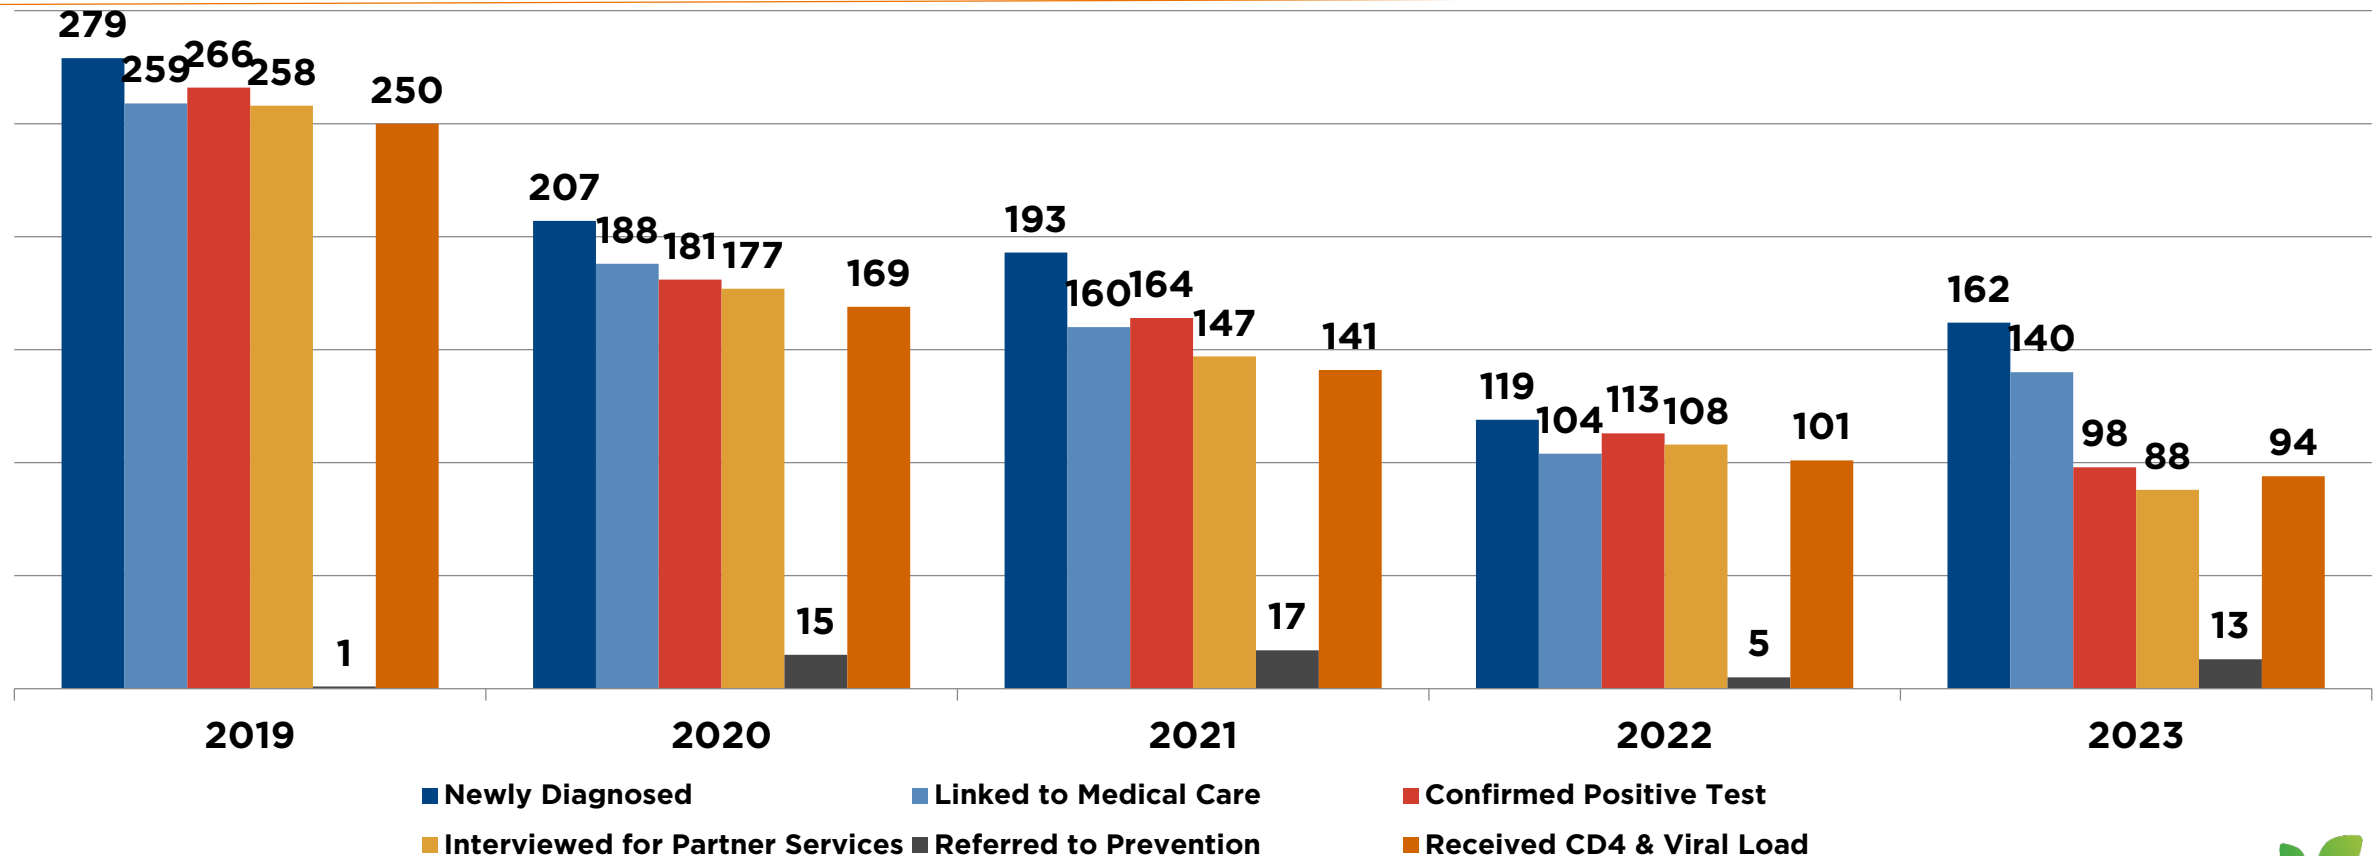

Total Tested in Orlando Service Area

Publicly funded testing events 2019-2023

Newly Diagnosed

Orlando Service Area, 2019-2023

**Referrals to prevention services can include things like PrEP, behavioral interventions, risk reduction counseling services, and medical services. If a newly diagnosed or previously diagnosed client went to a private provider for linkage and services, it might not get noted in the HIV Counseling & Testing system.*

Newly Diagnosed Percentages

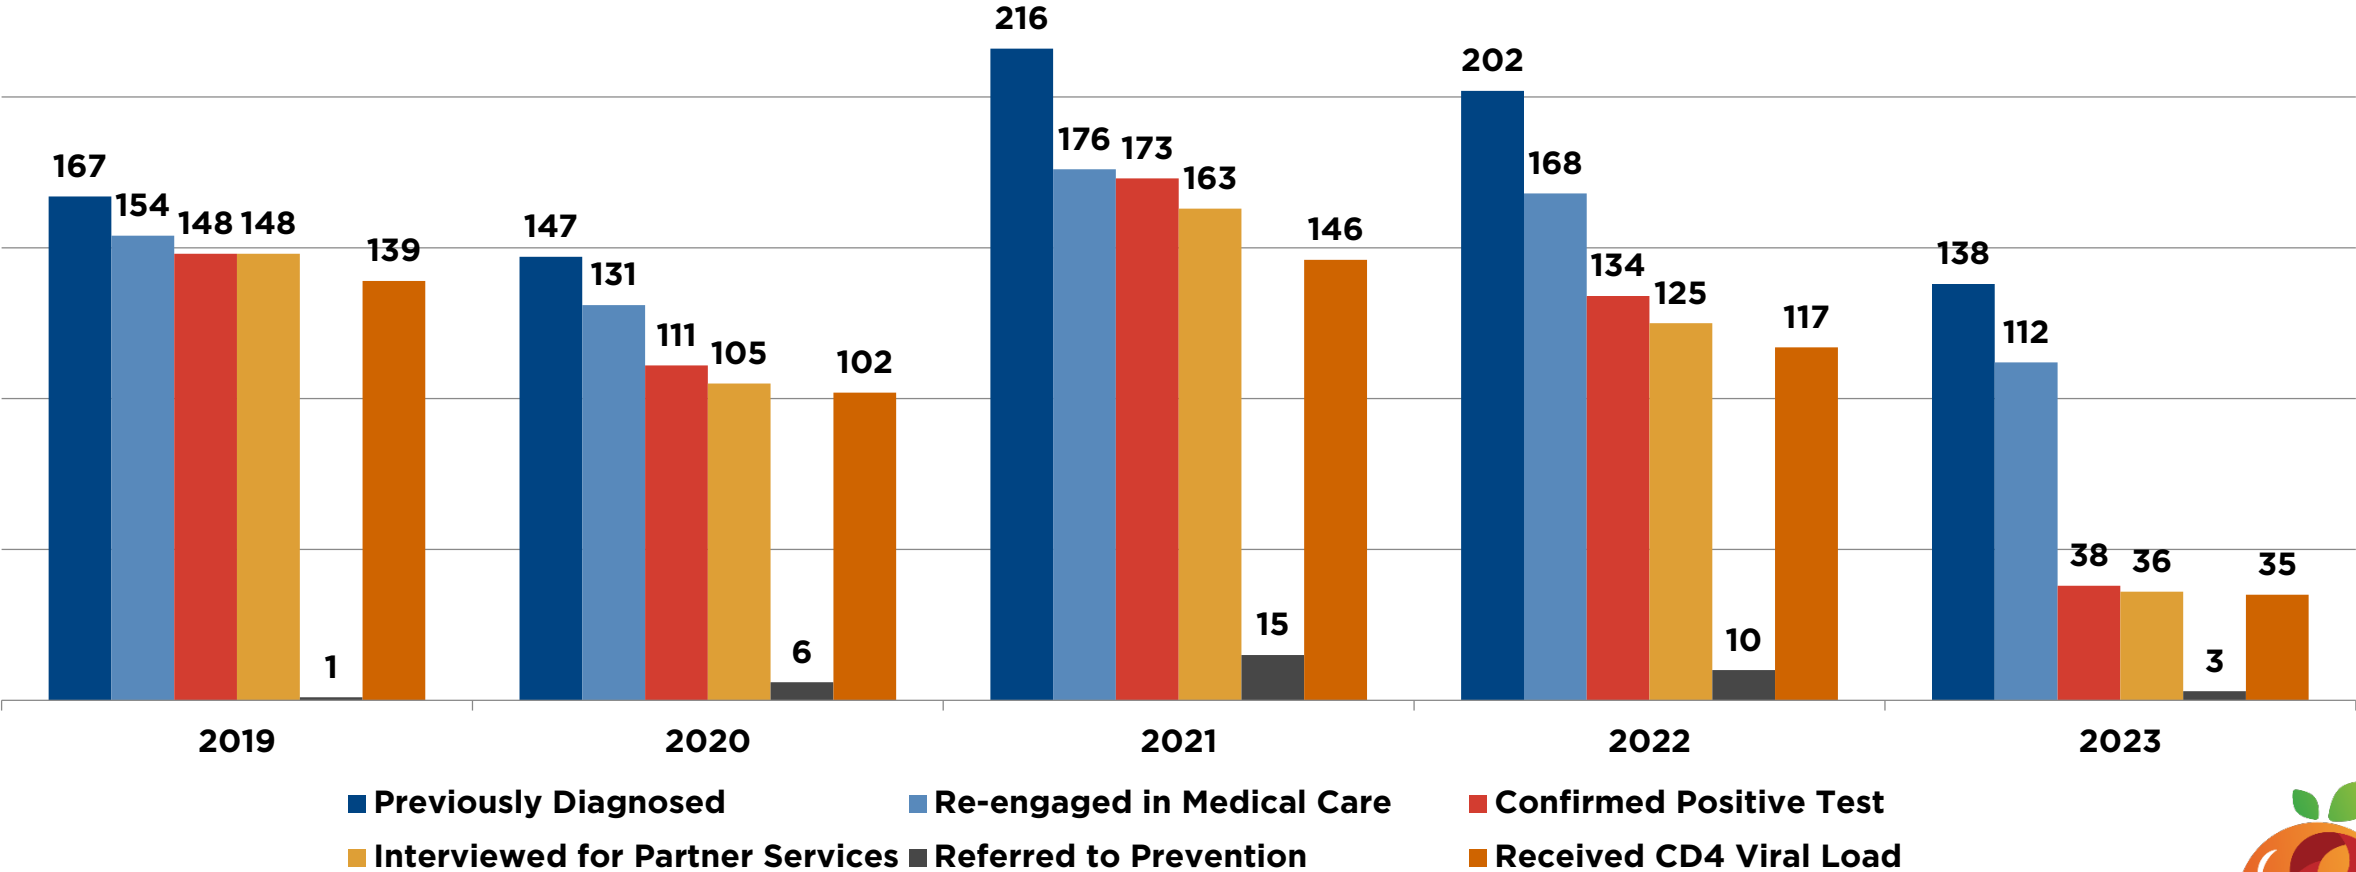

Orlando Service Area, 2019-2023

	2019	2020	2021	2022	2023
Newly Diagnosed	279	207	193	119	162
Linked to Medical Care	93%	91%	83%	87%	86%
Confirmed Positive Test	95%	87%	85%	95%	60%
Interviewed for Partner Services	92%	86%	76%	91%	54%
Linked to Prevention Services	0.4%	7%	9%	4%	8%
Received CD4 Count & Viral Load Numbers	90%	82%	73%	85%	58%

Previously Diagnosed

Orlando Service Area, 2019-2023

*Referrals to prevention services can include things like PrEP, behavioral interventions, risk reduction counseling services, and medical services. If a newly diagnosed or previously diagnosed client went to a private provider for linkage and services, it might not get noted in the HIV Counseling & Testing system.

Previously Diagnosed Percentages

Orlando Service Area, 2019-2023

	2019	2020	2021	2022	2023
Previously Diagnosed	167	147	216	202	138
Re-engaged in Medical Care	92%	89%	81%	83%	81%
