

Early Identification of Individuals with HIV/AIDS

Prepared for Data Presentation: September 19, 2025

Presented: September 17, 2026

Objectives

- Become familiar with EIIHA data and know its purpose
- Understand the impact on collaboration with other Ryan White parts and prevention
- Recognize your role in EIIHA and its impact on future funding

What is EIIHA?

- Early Identification of Individuals living with HIV/AIDS
- A strategy introduced by HRSA in September 2009
- Its purpose is to ensure all people know their status, whether it's positive or negative
- It also outlines the need to develop a strategy to bring people with HIV into care
- Geographical boundary: Orlando Eligible Metropolitan Area (EMA)
 - Lake, Orange, Osceola, & Seminole Counties

EIHA Strategy

The four components:

1. Testing:

- Traditional and rapid testing

2. Counseling:

- Pre and post counseling, regardless of test result

3. Referrals:

- Referring individuals to appropriate services and verifying that services were accessed

4. Linkage:

- Linking individuals to medical care

EIHA vs Unmet Need

- **EIHA:** A person with HIV who is UNAWARE of their status and not in primary medical care.
 - Unaware = Any person who has NOT been tested for HIV in the past 12 months.
- **Unmet Need:** A person with HIV who is AWARE of their status but not in primary medical care.

Knowing your HIV Status

- The most important piece to the EIIHA puzzle is increasing the number of people being tested at least once every 12 months
- Two-part goal:
 1. Increase the number of people who know their status
 2. Increase the number of people with HIV in care

EIIHA

Total Tested in Orlando EMA

Publicly funded testing events 2020-2024

Newly Diagnosed

Orlando EMA, 2020-2024

**Referrals to prevention services can include PrEP, behavioral interventions, risk reduction counseling services, and medical services. If a newly diagnosed or previously diagnosed client went to a private provider for linkage and services, it might not get noted in the HIV Counseling & Testing system.*

Newly Diagnosed Percentages

Orlando EMA, 2020-2024

	2020	2021	2022	2023	2024
Newly Diagnosed	207	193	119	162	206
Linked to Medical Care	91%	83%	87%	86%	83%
Confirmed Positive Test	87%	85%	95%	60%	47%
Interviewed for Partner Services	86%	76%	91%	54%	40%
Received CD4 Count & Viral Load Numbers	82%	73%	85%	58%	41%
Referred to Prevention Services*	7%	9%	4%	8%	3%

**Referrals to prevention services can include PrEP, behavioral interventions, risk reduction counseling services, and medical services. If a newly diagnosed or previously diagnosed client went to a private provider for linkage and services, it might not get noted in the HIV Counseling & Testing system.*

Previously Diagnosed

Orlando EMA, 2020-2024

*Referrals to prevention services can include PrEP, behavioral interventions, risk reduction counseling services, and medical services. If a newly diagnosed or previously diagnosed client went to a private provider for linkage and services, it might not get noted in the HIV Counseling & Testing system.

Previously Diagnosed Percentages

Orlando Service Area, 2020-2024

	2020	2021	2022	2023	2024
Previously Diagnosed	147	216	202	138	122
Re-engaged in Medical Care	89%	81%	83%	81%	82%
Confirmed Positive Test	76%	80%	66%	28%	41%
Interviewed for Partner Services	71%	75%	62%	26%	36%
Received CD4 Count & Viral Load Numbers	69%	68%	58%	25%	36%
Referred to Prevention Services*	4%	7%	5%	2%	5%

**Referrals to prevention services can include PrEP, behavioral interventions, risk reduction counseling services, and medical services. If a newly diagnosed or previously diagnosed client went to a private provider for linkage and services, it might not get noted in the HIV Counseling & Testing system.*

Populations of Focus, Orlando EMA

Publicly funded testing events in 2024

Newly Diagnosed Populations of Focus

Orlando EMA, 2024

**Referrals to prevention services can include PrEP, behavioral interventions, risk reduction counseling services, and medical services. If a newly diagnosed or previously diagnosed client went to a private provider for linkage and services, it might not get noted in the HIV Counseling & Testing system.*

Newly Diagnosed Percentages

Orlando EMA, 2024

	Black Heterosexual	Hispanic/ Latino MMSC	Black MMSC	White MMSC
Newly Diagnosed	18	4	3	2
Linked to Medical Care	100%	100%	100%	100%
Confirmed Positive Test	61%	0%	33%	100%
Interviewed for Partner Services	61%	0%	33%	100%
Received CD4 Count and Viral Load Numbers	61%	0%	33%	100%
Referred to Prevention Services*	11%	0%	0%	0%

**Referrals to prevention services can include things like PrEP, behavioral interventions, risk reduction counseling services, and medical services. If a newly diagnosed or previously diagnosed client went to a private provider for linkage and services, it might not get noted in the HIV Counseling & Testing system.*

Previously Diagnosed Populations of Focus

Orlando EMA, 2024

*Referrals to prevention services can include PrEP, behavioral interventions, risk reduction counseling services, and medical services. If a newly diagnosed or previously diagnosed client went to a private provider for linkage and services, it might not get noted in the HIV Counseling & Testing system.

Previously Diagnosed Percentages

Orlando EMA, 2024

	Black Heterosexual	Hispanic/ Latino MMSC	Black MMSC	White MMSC
Previously Diagnosed	14	31	26	9
Re-engaged in Medical Care	100%	97%	100%	100%
Confirmed Positive Test	57%	55%	46%	89%
Interviewed for Partner Services	57%	48%	42%	89%
Received CD4 Count and Viral Load Numbers	57%	52%	46%	89%
Referred to Prevention Services*	0%	3%	12%	11%

**Referrals to prevention services can include PrEP, behavioral interventions, risk reduction counseling services, and medical services. If a newly diagnosed or previously diagnosed client went to a private provider for linkage and services, it might not get noted in the HIV Counseling & Testing system.*
